If you or anyone in your family have any food allergies please check ingredients before cooking.

The cooking instructions and directions in the recipes are offered as guidelines only. Use your best judgement and proper discretion when preparing or consuming any food.

- Dairy and Alternatives
- Oils and Spreads

It's important to get some fat in your diet, but foods that are high in fat, salt and sugar have been placed outside of the circular image as they're not necessary as part of a healthy, balanced diet and most of us need to cut down on these.

Unsaturated fats from plant sources (for example, vegetable oil or olive oil) are healthier types of fat.

But all types of fat are high in energy (calories), so they should only be eaten in small amounts.

On average, women should have around 2,000 calories a day (8,400 kilojoules) and men should have around 2,500 calories a day (10,500 kilojoules). Most adults consume more calories than they need.

Fruit and Vegetables

Most of us are still not eating enough fruit and vegetables. This should make up a third of the food we eat daily.

Aim to eat at least 5 portions of a variety of fruit and vegetables a day. You can choose from fresh, frozen, dried or tinned.

Remember that fruit juice and smoothies should be limited to no more than a combined total of 150ml a day.

Fruit and vegetables are a great source of vitamins and minerals.

Carbohydrates

Starchy foods should make up just over a third of the food we eat. Choose higher fibre wholegrain varieties, such as wholewheat pasta and brown rice, or simply leave skins on potatoes.

There are also higher fibre versions of white bread and pasta.

Starchy foods are a good source of energy and the main source of a range of nutrients in our diet.

Proteins

These foods are good sources of protein, vitamins and minerals. Pulses, such as beans, peas and lentils, are good alternatives to meat because they're lower in fat and higher in fibre and protein, too.

Choose lean cuts of meat and mince, and eat less red and processed meat like bacon, ham and sausages.

Aim for at least two portions of fish every week, one of which should be oily, such as salmon or mackerel.

Dairy and Alternatives

Milk, cheese, yoghurt and fromage frais are good sources of protein and some vitamins, and they're also an important source of calcium, which helps keep our bones and teeth strong.

Try to go for a lower fat milk and lower sugar products where possible, like 1% fat milk, reduced-fat cheese or low -fat plain yoghurt.

Oils and Spreads

Unsaturated fats are healthier fats and include vegetable, rapeseed, olive and sunflower oils.

Remember all types of fats are high in energy and should be eaten sparingly.

The Eatwell Guide is used in this recipe book to prepare meals that are healthy and well balanced. It is important that during a time where illnesses are more present, it is essential to keep our bodies well nourished.

Substitute products

With everyone at home, it is a perfect time to get creative with what you have in your cupboards and freezer. Try to think about products you can swap over or substitute. This is handy to make recipes more interesting and if you find that the supermarkets are out of stock of some products, there is always other options to make your perfect recipe!

Onions

If onions are in short supply, shallots work as a replacement - though bear in mind that you'll probably need to use more, given that they are smaller than onions. Shallots may also create a milder flavour in the dish.

UHT milk

In the absence of UHT dairy milk, you may be able to find non-dairy substitutes which have a long life, including oat, soya or almond milk.

If none of these are available, you can make your own oat milk with a blender fairly easily using water, oats and a pinch of salt. There are plenty of recipes online for doing this.

Oil

Most oils can be substituted for one another without affecting the flavour of a dish too much - for instance, swapping over vegetable oil for rapeseed oil.

If you can't get hold of oil at all, you can use butter as a replacement, instead.

Eggs

If you're baking and need eggs, you can mix one teaspoon of baking soda with a tablespoon of vinegar to replace one egg. Apple cider vinegar or white distilled vinegar are the best to use for this. If you've got no eggs in and fancy something scrambled on your toast, you could try scrambling tofu instead, using recipes online. Tofu also has the advantage of having a fairly long shelf life.

Spaghetti

If making your own pasta sounds too fiddly, you can replace spaghetti with noodles without affecting the flavour of your dish too much - especially with a tasty sauce.

Flour

Depending on what you're cooking, like oil, most flours can be substituted for one another. However, if a recipe requires self-raising flour, normal flour is unlikely to work as a substitute. Instead, add two teaspoons of baking powder to each cup (150g) of allpurpose plain flour. If you can't get hold of flour at all, you can blend rolled oats as a replacement.

Rice

Rice can be replaced by a number of other grains, including quinoa, barley or bulgur wheat. Tinned chickpeas and other tinned pulses. If you're struggling to get hold of tinned food, bear in mind that some of what you're looking for may come in dried form - like chickpeas or lentils for example - so check the shelves to see if the dried version is available.

Garlic

If there's no fresh garlic on offer, check other sections for garlic paste, garlic granules or frozen garlic.

Naan bread

Can't find any naan bread? Using flour, water and salt, you can easily make your own chapatis as a replacement at home.

Coconut milk

Instead of coconut milk, you can try using the same amount of whole milk or yoghurt as a replacement.

Vegetables

Vegetables can be found fresh, in tins and in the frozen section of supermarkets, so try all three before you give up on your five a day.

Carrot, Cumin and Kidney Bean Burger

Serves a family of 4

Ingredients

400g kidney beans	1 teaspoon
1 smallish onion (150g approx.), peeled and finely chopped	1 tbsp vegetable or sunflower oil, plus 2 tablespoons to fry the burgers
1 large carrot, grated	1 heated teaspoon flour, plus another to shape the burger
1tsp cumin powder	

Method

1. Drain the kidney beans and rinse in cold water to wash away the 'tinned' taste. Put into a saucepan and cover with cold water. Bring to boil, then simmer for 10 minutes to really soften.
2. Put the onion, carrot and cumin into a medium frying pan. Add the splash of oil and cook on a low heat to soften. When the kidney beans have softened, drain well and add to the carrots and onions. Remove from the heat and mash together until you have a smoothish puree, like a mashed potato consistency. Stir in the flour to stiffen.
3. Heat the remaining oil in the frying pan on a medium heat. With floured hands, take a quarter of the burger mixture and roll into a ball. Make three more balls with remaining mixture. Place one in the oil and flatten gently with a fork to make a burger shape. Depending on the size of your pan, you may be able to cook all the burgers at once. Cook for a few minutes on one side before turning. Handle burgers with care as they can be fragile before done. When cooked, take from pan and serve.

Pasta e Ceci

Serves a family of 4

Ingredients

400g tin of chickpeas, drained and rinsed

6 cloves of garlic, (or 2 tbsp garlic paste)

1 vegetable stock cube dissolved into 700ml boiling water (optional)

400g tin of chopped tomatoes

1 tsp vinegar

½ tsp mixed dried herbs

Pinch of pepper

400g tin spaghetti hoops 1 pinch of chilli (optional)

Method

1. Tip the chickpeas into a medium saucepan and add the garlic cloves - whole is fine as they will be cooking for quite some time, so will end up soft and sweet, or use puree. Add 700ml to the stock and bring to a boil, then reduce to simmer. Cook for 40 minutes to make the chickpeas super soft.
2. Pour over the tomatoes and add the vinegar, herbs and pepper, then cook for a further 10 minutes.
3. Tip the spaghetti hoops into a sieve or colander and rinse very slowly and gently to get rid of as much sticky orange sauce as possible. Add the hoops to the pan and warm through for 2 minutes, stirring carefully, then season with pepper and chilli.

Perfect Pasta and Tomato Sauce

Serves a family of 4

Ingredients

1 tsp olive oil	2 tsp dried mixed herbs
1 small onion, finely chopped	1 pinch of black pepper
1 garlic clove, crushed or finely chopped	350g dried spaghetti
400g chopped tomatoes	1 tbsp chopped fresh basil, to garnish
2 tbsp tomato puree	

Method

1. Heat the oil in a saucepan or frying pan. Add the onion and cook over a medium heat for 3 to 4 minutes, until soft. This sauce makes a great cover for some hidden veg to help towards your 5 a day. You could try adding finely chopped peppers or courgettes to cook with the onions. And if the sauce is a bit chunky, simply blend or puree it at the end.
2. Add the garlic, and cook for another minute. Add the chopped tomatoes, tomato puree and mixed herbs. Season with pepper and then simmer gently, stirring every now and again, for 15 minutes or until the sauce is thick and rich.
3. After the sauce has been simmering for 8 to 10 minutes, start cooking the spaghetti according to the pack instructions.
4. Drain the spaghetti and serve with the sauce, topped with fresh basil or other chopped herbs if you like. Try stirring about 12 halved cherry tomatoes through the sauce just before serving for a juicy, fresh twist.

Mushroom and Chickpea Curry

1 clove of garlic	200g canned chickpeas, drained

2. Heat the oil in a saucepan and fry the onion, garlic and mushrooms for 5 minutes.

Lentil Soup

150g red lentils

6 carrots, finely chopped

2 medium leeks, sliced (300g)

Small handful chopped parsley,
to serve

2. Heat the stock in a large pan and add the lentils. Bring back to the boil and allow the lentils to soften for a few minutes.
3. Add the carrots and leeks to the lentils and season (don't add salt if you use ham stock as it will make it too salty). Bring to the boil, then reduce the heat, cover and simmer for 20-30 minutes until the lentils have broken down. Scatter over the parsley and serve with buttered bread, if you like.

Funky Vegetable Fajitas

Serves a family of 4

Ingredients

1 onion	Beansprouts
1 clove of garlic	4 wholemeal tortillas
1 red pepper	Handful of lettuce leaves
1 green pepper	1 tsp sour cream
3-4 mushrooms Dried oregano	1 tbsp salsa

Method

1. Chop the onion, garlic, peppers, mushrooms and beansprouts on a chopping board.
2. Put a drop of oil into a frying pan and put the chopped onions into the pan, frying them on a low heat till they are golden. Add some crushed garlic to them.
3. Now add the chopped peppers and plenty of oregano. Stir them as they cook. You can also add the other chopped vegetables to the pan. When the peppers are softer, add the mushrooms to the mix. Mushrooms need less time to cook than the other vegetables.
4. Warm the tortillas in the oven whilst the vegetables are cooking for 5 minutes. When the tortillas are ready, spoon the mixture onto them making a line in the middle. Add some crunchy bean sprouts then fold the tortillas over. Serve with lettuce leaves, sour cream and salsa.
